Application/Control Number: 09/016737 Page 2

Art Unit: 1642

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method of treatment of prostate cancer by administration of T cells, classified in class 424, subclass 93.71.
- II. Claims 13-22, drawn to a method of treatment of prostate cancer by administration of dendritic cells, classified in class 424, subclass 184.1.
- III. Claims 23-30, drawn to a composition comprising dendritic cells, classified in class 435, subclass 366.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. The inventions of Groups I and II are drawn to entirely different methods involving entirely different method compositions and involving entirely different method steps and mechanisms.

4.

5. The Inventions of Group II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the compositions may be used for *in vitro* procedures to stimulate immune cells as well as to stimulate antibodies.

Application/Control Number: 09/016737 Page 3

Art Unit: 1642

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search and

consideration required for any single Group is not required for any other Group, restriction for

examination purposes as indicated is proper.

8. This application contains claims directed to the following patentably distinct species of the

claimed invention:

Each of Groups I, II, and III are drawn to the following species

a) antigens and sequences derived from prostate cell lysates

b) antigens and sequences derived from prostate cell membranes.

c) PSMA and sequences of PSMA

d) PSA and sequences of PSA

e) prostate mucins and sequences of prostate mucins.

Each of these antigens differ, one from the other, being drawn to entirely different types of

chemical molecules, differing in structure, function, and activity. Each species of antigens requires

unique searches and considerations which are not required and not related to those of any other

species of antigen.

Application/Control Number: 09/016737

Art Unit: 1642

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 5-12, 13-15, 17-22, and 23-30 are generic.

Page 4

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1642

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne Eyler, Ph.D. whose telephone number is (703) 308-6564. The examiner can normally be reached on Monday through Friday from 830am to 630pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Hutzell, can be reached on (703) 308-4310. The fax phone number for this Group is (703) 305-3014 or (703) 308-4242.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [paula.hutzell@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
